

U 16 local elections in our school

In the U16 elections the people who are under 16 can also vote for the town council and the mayor.

Till / Year 8

We first learned a lot about every party in Politics. Then we could vote on a website for which party we prefer the most. A couple of days later a young man and a young woman came in and we put a cross beside the party we liked the most.

When I looked at the results, I found it interesting that both of the grammar schools have the smallest percentage of votes for the AfD.

Lotta / Year 8

I think it's interesting that the CDU, SPD and the Greens were the three strongest parties everywhere.

Karina / Year 8

A few days ago, there was an election in Grevenbroich for pupils under 16. The under 16s got a leaflet which has information about the election and the local government. They could also use the "Wahl-O-Mat" to find out which party represents their interests. Then two people came into the classroom and the kids could vote. After that people counted the results. The strongest party in Grevenbroich for the U16s is the CDU with 26%. Close behind is the SPD with 25% and the third most popular party is the Greens with 16%.

Isabel / Year 8

Last Thursday (3.9.2020) we voted in the under-16 local election. Before we did that, we looked at all the parties and used the Wahl-O-Mat and our teacher talked with us about the election and we learned a lot of new vocabulary. On the day of the election other students came with ballot boxes and ballot papers. Then we voted for a party and a mayor. Then they collected our papers and went out of the classroom.

Sarah / Year 7

I like that there are such different results and lots of different colours.

Marie & Frieda / Year 7

The most interesting thing for me is that Pascal has three main big parties.

Lukas / Year 8
